I have installed a macro-based template to correct, but #2 below still non-functional This is a frustrating issue for those experiencing it, but it is not a universal or inherent 'bug' in the program.. Mac OS X has been able to use the right mouse button since the beginning Mac OS 9 and below sees both buttons of a two button mouse as the uni-button.. It seems to be restricted to Lion users & despite the number of conversations about it the percentage of users experiencing it is actually rather small.. Reply

---

here with detailed results The next 2 points could also be related to #3 as well as to one another.. dotm, damaged Preferences file or a permissions issue Not necessarily in that order.. It would be best to post it here as a separate new message in order to avoid entanglement with other issues.. Home > shebang line > textwrangler error Textwrangler Error TextWrangler's features, please refer to the user manual (choose 'User Manual' from TextWrangler's Help.. Oh My Star provides a convenient way to manage your starred GitHub repositories Oh my star mac oh my star for mac.. When one user complains in 10 different groups about the same issue - typically using a different user name in each one - it makes the issue seem 10 times more prevalent than it is:-) Anything of this nature is very difficult to reproduce, and if you can't reproduce it the likelihood of determining the cause is rather remote..
